

HTTP Status Codes Summary

The outcomes of an HTTP request are conveyed via HTTP status codes. They consist of three numbers, the first of which represents the response's general class. Further detailed information about the response is given by the other two digits.

The five classes of HTTP status codes are:

1xx: Informational requests

2xx: Successful requests

3xx: Redirects

4xx: Client errors

5xx: Server errors

Some of the most important ones

200: OK

301: Moved Permanently

302: Found

401: Unauthorized

403: Forbidden

404: Not Found

500: Internal Server Error

503: Service Unavailable
