

## Examples For Cybersecurity Terminologies

1. Cybersecurity:
  - Threat Assessment
  - Risk Mitigation
2. Social Engineering:
  - Phishing Attack
  - Eavesdropping
3. Malware:
  - Virus
  - Worm
  - Trojan
4. Man-in-the-Middle Attack:
  - Wire eavesdropping
  - Email Interception
5. Packet Sniffer:
  - Network Traffic Analysis
  - Data Theft
6. Brute Force Attack:
  - Password Guessing
  - PIN Cracking
7. Code Injection:
  - SQL Injection
  - Cross-Site Scripting
8. Keylogger:
  - Password Theft
  - Monitoring Online Activity
9. Rogue Software:
  - Scareware
  - Ransomware
10. Distributed Denial of Service:
  - Website Overload
  - Network Congestion
11. Malvertising:
  - Malicious Ads
  - Drive-by downloads
12. Password Attacks:
  - Dictionary Attack
  - Rainbow Table Attack
